PROJECT HASH

CHECKLIST

Wallet and seed phrase checklist

Set up the wallet your miner pays into, and prove you can restore it.

BEFORE YOU SET IT UP

- [ ] Get the app or device from the maker's own site, typed in by hand.
- [ ] Check that the wallet supports the coin you mine and gives you your own keys.
- [ ] A hardware wallet arrives sealed and without any words filled in. If words came with it, do not use it.
- [ ] Update the phone, computer or device first.
- [ ] Do it alone, with no camera, screen share or smart speaker in the room.

WRITE DOWN THE SEED PHRASE

- [ ] Write the words by hand, in order, with their numbers.
- [ ] Read them back against the screen, letter by letter.
- [ ] Make a second copy and keep it in another place.
- [ ] No photo, no file, no email, no password manager, no printer.
- [ ] If you add a passphrase, write it down too and keep it apart from the words.
- [ ] Choose a place that is dry, safe from fire and known to somebody you trust.

TEST IT BEFORE IT HOLDS ANYTHING

- [ ] Write down the first receiving address.
- [ ] Reset the wallet or use a second device, and restore it from your paper.
- [ ] Check that the same address comes back.
- [ ] Receive a small amount, then send it on, so you have done both once.

Date of the restore test _____ Where copy 1 is kept (no details) _____

Where copy 2 is kept (no details) _____

SET THE PAYOUT ADDRESS AT THE POOL

- [ ] Use an address for the right coin and the right network.
- [ ] Copy and paste it. Compare the first and last six characters on the wallet’s own screen.
- [ ] Turn on two-factor sign-in at the pool, and the delay for address changes if it has one.
- [ ] For Litecoin and Dogecoin together, enter an address for each.
- [ ] Wait for the first payout and find it in the wallet before you leave the setting alone.

Coin	Address, last six characters
Pool	Date set

HABITS

- [ ] Never type the words into a website, a form or a chat.
- [ ] Answer nobody who offers help in a message. Support does not write first.
- [ ] Send a small test amount before a large one.
- [ ] Check once a year that both copies are where you think and can still be read.
- [ ] Keep a list of which wallet receives from which pool, without any secret on it.

NOTES

General guidance. Where your maker's manual or terms differ, follow them.
