Project Hash

CHECKLIST

Used miner inspection checklist

What to check before and after you buy a used machine.

BEFORE YOU PAY

- [ ] Ask for the serial number, the original invoice and recent photos.
- [ ] Check the serial and the warranty status on the maker's site.
- [ ] Ask for a live video of the dashboard showing hashrate and temperatures.
- [ ] Ask whether the unit was opened, repaired or run in immersion.

ON ARRIVAL

- [ ] Check the serial and tamper labels are intact and match.
- [ ] Look for corrosion, burn marks or loose connectors.
- [ ] Check the fans turn freely by hand with the power off.

TEST RUN

- [ ] Run it with stock settings for several hours.
- [ ] Compare the hashrate with the rated figure for that version.
- [ ] Watch the log for board or chip errors.

NOTES

General guidance. Where your maker's manual or terms differ, follow them.
